## Commercial applications

Our complete range of tanks are suitable for commercial applications with customisable sizes and pipework connections. With 30 years' experience in water storage solutions you can trust us to design a system that will work

### BREAK TANKS

- Any size connections for flow and pump requirements
- Suitable for potable water

### RAINWATER REUSE TANKS

- Fully engineered and watermarked for peace of mind
- Multiple tanks are a cost effective option to a panel tank

### OSD TANKS

- Any configuration of orifices and overflows
- Large fitting sizes allow for manifold interconnections between multiple tanks

### CAN BE USED ANYWHERE AS SINGLE OR MULTIPLE SYSTEMS

- Apartments and multi-level buildings
- Basements and carparks

### The WaterLine advantage:

- Fully customisable dimensions and shapes
- Prefabricated or built onsite - depending on site
- Light weight – can be easily trolleyed or craned in
- Full certification to ATS 5200.026 and Watermark certified
- Onsite visit to determine best system design and parameters
- Any size and material pipe connections available up to 300mm
